

Object Oriented Program in Javascript

Parts of OOPs

1. Object literals
2. Constructor function (her baar function ki new copy bna kr deta ha new keyword ka use krke)
 - instance (new, this, instanceof)
3. prototypes
4. classes
 - instanceof

4pillars

1. Abstraction
2. Encapsulation
3. Inheritance
4. Polymorphism

new keyword working

1. sb se phle ek empty object create hota ha
2. phir ek constructor function ko call krta ha
3. ab this keywords ka use saare value ke andr inject hojate ha
