# Async Await in js

**Async/Await**: Promise ka wrapper, jo code ko aur readable banata hai.

1. Normal Function

```
let url= 'https://dummyjson.com/products'

async function value(){
      try{
         let res = await fetch(url)
         let data = await res.json()
         console.log(data)
      }
      catch{
          console.log("error")
      }
}
value()
```

2. Arrow function

```
let value = async ()=>{
      try{
         let res = await fetch(url)
         let data = await res.json()
         console.log(data)
      }
      catch{
          console.log("error")
      }
}
value()
```
